# OUR FABRIC SPECIFICATION

<b><u>Soft Texture</u></b> Nova textiles manufacture soft texture fabrics to make wearer feel soft and smoothness on skin	<b><u>Breathable</u></b> Our fabric is actively ventilated and it passively allow water vapor to diffuse through them yet prevents the penetration of liquid water.	<b><u>Fastness Guarantee</u></b> Nova textiles avoids colorfastness by testing the fabrics for colorfastness. So that the fabric remains the same color after many washes.
<b><u>Stretchable</u></b> Nova textiles makes the fabric with Lycra, elastane & spandex to give the stretchiness on the fabric.	<b><u>Comfort</u></b> We make the perfect fabric to give the comfort. So that the end user can feel the comfort while wearing the product.	<b><u>Shrinkage Contro</u></b> We Use relaxation dryers, compactor, or crosslinking agents to reduce the residual shrinkage after wet processing.

## Quality

We have a committed group of experts who knows the field minutely and even gets it. Our team keeps themselves side by side with the most recent patterns going on the market and after a legitimate examination they delivers an item coordinating with client satisfaction. They keep themselves refreshed with the most recent innovation. Fabric are tested for Color Fastness, GSM,
